Online Food Ordering System

## Projects

### BANGALIANA(Online Food Ordering System)

Creating a Online Food Ordering System by using MERN STACK. Set up a Node.js server using Express.js. And used MongoDB for the database to store information about users, restaurants, menus, orders, etc. Develop the user interface using React to allow users to browse restaurants, view menus, place orders.

Implement features like user registration, login, and profile management. Connect the frontend and backend using API calls to fetch and send data between the client and server.
